Personal Summary

Data Scientist with a background of 3+ years' experience within professional client facing environments. Communicates and optimize client satisfaction to create results for companies utilizing technical expertise.

Education

University of Leicester - Computer Science BSc.

September 2023 - June 2026

- Predicted Grade: First Class (1:1)
- Rel. Modules: Data Analytics, Project Management, Software Engineering, Databases

Google's Advanced Data Analytics Professional Certificate

The John Fisher School - A-Level & GCSEs

September 2015 - August 2022

- A-Levels: EPQ, Maths, Chemistry, Biology
- Grades 9-6 10 GCSEs incl. Maths (8), English Language (6), English Literature (6)

Work Experience

Data Science Consultant – DataKind UK, London

September 2025 – Present

- Supporting third sector organisations and non-profits to amplify their data science infrastructure, implications
- Collaborated with a community to best support volunteering experience.

Workstream Lead & Advisor – Student Union, Leicester

January 2025 – Present

- Strengthened skills in data storytelling, insight generation, and presenting research to decision-makers.
- Analysed large-scale student feedback datasets to inform university decision-making and drive improvements across accommodation and campus services

Projects

JP Morgan & Co – 2025 Executive Insights Report, Driving Strategic Decisions with SEC Data

- Conducted analysis in Python, Excel and SQL to surface insights exploring Risk, Benchmarks and Opportunities using containing over 3.5M+ financial records for JP Morgan independently. Cleaned, analysed data in Excel & Python and built a performance dashboard and visualizations to showcase key investment industries and surfaced insights spanning, competitive benchmarking, growth signals, financial assessment risk and investment scouting. Presented report insights in a format easy understandable for people in differing backgrounds.

Time Series Forecasting

- Performed exploratory analysis and cleaning for dataset with 20K+ rows in Python and Excel to understand and forecast trends for a retail store over the past 6 years. Used Python to build machine learning models to predict demand using techniques such as Linear Regression, Deseasoning, and Multistep Forecasting to predict product demand. Produced Power BI visualizations and GitHub-hosted reports to present findings in a stakeholder-ready format.

Full-Stack Website – IBM Skills Build

- Developed a full-stack Spring Boot website with Java, SQL, HTML, and CSS, graded at a First-Class.
- Designed and implemented digital marketplace features, managing structured databases for customer transactions.

Technical Skills

Languages: Python, SQL, Java, JavaScript, TypeScript, HTML, CSS, React

Development Tools: Power BI, Excel, GitHub, Microsoft Office 365

Data Methods: EDA, Linear Regression, Time Series Forecasting, A/B Testing, Model Development, Data Cleaning & Validation (Matplotlib, Seaborn, Pandas, Numpy, Sklearn)

Additional Work Experience

Group IT Intern – RICOH UK, London

May 2018 – June 2018

- Delivered tech-support, deploying new & existing equipment, installed & configured software on 100s of devices.
- Maintained software & hardware asset inventory consisting of 1000s of devices from several countries with GDPR
- Collaborated with local and international service desk teams to follow up on incidences in service and internal management systems.

Leadership / Extracurricular

Computer Science Mentor – The John Fisher School, London

January 2016 – July 2019

- Hosted and presented at events such as assemblies, including Award Ceremonies, Cyber Security campaigns across the school regularly. Each consisted of 150-200 students and parents.
- Curated & taught lessons teaching 30 students programming fundamentals in an interactive way using micro-bit
